Subject: Letter to respond to and trespass pic.

Virginia%20City%20... (39KB) 2008-09-09 - Blak... (249KB), 2008-09-09 - Ease... (286KB)

Hi Dean,

Here is a copy of the letter that Howard is waiting for a response on. I got a copy of it in the packet that you gave me the day that Phyllis and I met with you, Pat & Laura. Will you please look into this and let me know who will be responding, the County Commissioners or yourself? The 10 acre association does have the right to review the plans before a permit is issued.

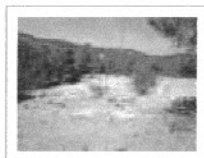

I also would like for you to get back with me on the additions that were made to the existing towers that are currently under the Stop Work Order (as I understand). I would like to know if they are in direct violation with the Stop Work Order. We have witnesses that saw a man on the existing towers making modifications.

According to SCBC 15.12.010..."It is unlawful for any person...to...alter any sign, building, or structure within the county without first obtaining permit from the building official." Wouldn't this be unacceptable?

I am attaching pictures of the trespasses that occurred on the Blake property today. I am also attaching a picture of a new guy anchor that is clearly in the easement.

Thanks,
Michelle

Subject: Towers

FH010003.jpg (2.3MB)

Dean,

On October 4th a man was working on one of the towers. There are 3 witnesses that can verify this. In the August issue of the TDXS newsletter www.TDXS.net Tom Taormina says that "...he must get retroactive permits for all existing towers! This even precludes maintenance and repair of existing installations!"

My questions to you are: Is the stop work order still in effect? If it is still in effect, wouldn't a permit need to be drawn for work on these towers? Was he given permission to work on the towers? Can you verify the structural integrity of these towers? I spoke to you about this before and never heard anything back. I have attached a picture of the man on the tower.

Thanks,
Michelle Adkins
