**Subject:** Taormina's Towers

March 1, 2011

Honorable Planning Commission

We respectfully request that the towers Mr. Taormina is requesting permission to erect be refused. We would also like to see the existing towers removed as well.

Namely:

1. My husband has implanted cardiac devices and I am concerned that that many high frequency radio towers could cause problems. The map shows the radio beam going to VC passing directly over our home. Don has already had one pacemaker failure, the cause of which was never determined.
2. They interfere with telephones and other electronic devices in the neighborhood. I need to be able to call an ambulance if necessary, as I have several times in the past.
3. Our properties are adjacent to Mr. Taormina's property and antenna.
4. If a blinking red light is required it would blink into our home and be very distracting and, in my opinion, make our properties unsaleable.
5. If a light is not required we feel the high towers would be a danger to Care flight at night.
6. In the event of a fire in this neighborhood, would water bombers and heilicopters carrying water be endangered. The smoke could obscure the towers.
7. They are ugly and belong out in the desert, not in a housing development.
8. Is the Planning Commission and County prepared to assume responsibility for loss of life or property due to those towers?

I could go on and on but I hope you get my drift.

Thank you for your consideration

Georgianne Houser, Block U, lots 1, 2, 3, 4, 5, 6, 8, 9, and 29
