Jim,

My understanding is that the new larger base antenna is what he is asking to put up.

I am copying your email to the planning dept. via Donna & Austin.

If you haven't yet received the agenda for the meeting and site tour info for before the meeting, I can forward a copy of both agendas to you.

Thanks,

Lydia

Hi Lydia,

I just want to make sure that you notice the completely different type of antenna base Mr. Taormina wanted to erect a couple of years ago. If you haven't yet seen it, go to his Highlands Weather page [http://www.consultpr.com/highland\\_ranches\\_current\\_weather.htm](http://www.consultpr.com/highland_ranches_current_weather.htm) Highlands Weather and notice the picture at the top right of the page: horses with some ugly pipe sections in the foreground. That is what he wanted to erect a couple of years ago. These are completely different than his other antenna bases and look more like a large commercial billboard base...in NO WAY fitting for the Highlands, let alone at the very entrance.

I don't know that Mr. Taormina still plans to use those but if he does, IHO, the county should make every effort to deny him permission. New antenna(s) similar to those already erected, I would not object to.

Best Regards,

Jim O'Mahony  
Yellowjacket Rd.
